EDUCATION

Manipal Institute of Technology — Manipal, Karnataka
Bachelor of Technology, Department of Data Science Engineering — *Jul 2023 – Sep 2027*
Relevant Coursework**:** Data Structures & Algorithms, Computer Networks, Operating Systems, Database Systems, Probability & Statistics, Machine Learning, Deep Learning, Big Data Analytics

Mahatma Gandhi Memorial PU College, Karnataka State Board — Udupi, Karnataka
Completed Higher Secondary Education in PCMC — *Jul 2021 – Apr 2023*

EXPERIENCE

Software Developer Intern — *May 2026 – Jul 2026*
CodeLogs Technologies LLP
- Deployed an AWS serverless pipeline (S3, SQS, Lambda) and a Spring Boot Stripe backend featuring webhooks and metered billing, successfully processing **200+** real-world invoices.
- Developed a React and Spring Boot Supermarket Admin portal featuring role-based access control and a high-performance Excel import pipeline, successfully automating the categorization of **27,000+** products.
- Built the HR and Admin section of an internal company portal using React and Spring Boot, automating offer-letter generation and access control to reduce manual processing time by **60%**.

Coding Subsystem Head — *Sep 2025 – Present*
Team Robomanipal
- Enhanced and scaled the official Robomanipal website (*robomanipal.com*) boosting engagement with a **100%+ growth** in traffic, and a **98/100 Real Experience Score**, ensuring fast load times, robust UX.
- Represented MIT MAHE at **Technoxian 8.0 (Noida)**, competing in Line Follower and Maze Solver, and advanced to quarterfinal stage among **200+** teams, demonstrating embedded systems expertise.
- Secured **2nd Runner-Up at Robonautica, IISc Bangalore** among **179** teams nationwide, for developing a leader–follower robot using ArUco marker-based tracking to maintain distance, follow paths, and avoid collisions.

Research Intern — *Jun 2025 – Jul 2025*
Manipal Institute of Technology
- Engineered multiple machine learning models (Gradient Boosting, CatBoost, XGBoost, Random Forest) to detect phishing URLs, achieving up to **97.4%** accuracy and **97.7%** F1-score on **30,000+** samples.
- Performed feature extraction on lexical, structural, and content-based URL attributes, improving F1-score by **12%** compared to baseline models.
- Designed and deployed a Python-based phishing detection web application with real-time URL classification, reducing manual verification time by **70%**.

PROJECTS

PulseNotify | *Java, Spring Boot, PostgreSQL, AWS (SQS, Lambda, DynamoDB), Docker* — *Jun 2026 – Jul 2026*
- Architected a scalable notification platform allowing client systems to schedule and broadcast templated alerts via Email, SMS, and Push, leveraging AWS SQS and Lambda for reliable, non-blocking message delivery.
- Secured the platform by implementing a distributed API rate limiter (**100** req/min) and offloading refresh token management to DynamoDB, improving authentication scalability while preventing system abuse.

Planify | *TypeScript, React, Node.js, Express, PostgreSQL, Docker* — *Feb 2026 – Mar 2026*
- Developed a full-stack project management platform featuring task filtering, interactive dashboards, secure authentication, and **15+** REST APIs for streamlined productivity.
- Optimized backend performance through efficient PostgreSQL database design and Node.js API implementation, reducing average response time by **~35%** while supporting scalable task and project hierarchies.

Sign Language Gesture Analysis | *Python, TensorFlow, Keras, OpenCV, Numpy, Pandas* — *Oct 2025 – Nov 2025*
- Built a lightweight custom CNN (**~227K** parameters) to classify **24** static ASL hand gestures from the Sign Language MNIST dataset using normalization, augmentation, and regularization techniques.
- Achieved **99.69%** validation accuracy and demonstrated real-time webcam inference, correctly recognizing **20/24 gestures** under live conditions.

TECHNICAL SKILLS

Languages: Python, C/C++, Java, SQL (Postgres, Oracle), TypeScript/JavaScript, HTML/CSS
Frameworks: React.js/Next.js, NumPy, Pandas, Keras, Scipy, PyTorch, Matplotlib, TensorFlow, OpenCV, ROS/ROS2
Developer Tools: Git, Docker, GitHub Actions, AWS, VS Code, STM32CubeIDE, Ubuntu
Certifications: Generative AI with Large Language Models, Natural Language Processing in TensorFlow
